Panacea Health Clinic is the best medical clinic in the Parramatta region. The Doctors are very experienced and take their time with each patient, in order to properly understand each patient's unique case and provide each patient with the appropriate care and treatment. In comparison, other local medical clinics mostly hire young inexperienced doctors who don't spend adequate time with patients (but just rush through patients quickly).

I had a 3pm appointment and got in at 3:40pm. The receptionist said the doctor was running behind but that was not the reason. The doctor opened my file and accidentally marked my file as seen. Mistakes happen. My feedback is that the mistake could have been identified earlier. The receptionist quickly concluded that the doctor must have been behind. A closer examination would have meant that this was not the case. She ended up calling the doctor which should have happened earlier.

I generally don't like having to visit the Doctors - especially any type of medical centre where there is no guarantee on which Doctor I will see. Having said this, Panacea Health Clinic is great - It is the modern version of a classic Doctors surgery - where you can see and deal with the same Doctor, unlike so many medical centres these days. They make appointment bookings, which means there is usually no wait time at - or very minimal waiting around. They also offer services like blood tests etc. I would recommend them to anyone - but especially those who wish to see a regular Doctor, as opposed to a series of random Doctors.
